PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building production SaaS and Fintech applications in React, Next.js, and Typescript, delivering multiple production-ready features across legal technology and fintech platforms. Specializes in performance optimization (Core Web Vitals), accessible component architecture (WCAG 2.1 AA), and design-to-code workflows. Comfortable owning a frontend codebase end to end from architecture decisions through code review — and collaborating directly with design, product, and backend engineering.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES2022+), React.js, Next.js (App Router), HTML5, CSS3

Frontend-Adjacent APIs: RESTful APIs, Next.js API Routes, JWT Authentication, OAuth 2.0, SSR/SSG, Edge Middleware,

State & Data Management: Zustand, Redux Toolkit, React Query (TanStack), Context API, Axios, WebSockets, Chart.js, Paystack

Design Systems & UI Engineering: Tailwind CSS, Framer Motion, GSAP, CSS Modules, Storybook, Shadcn/UI, Figma (design-to-code), design tokens, component libraries

Accessibility & Performance: WCAG 2.1 AA, Core Web Vitals (LCP, CLS, INP), Lighthouse, lazy loading, Google PageSpeed Insights, Chrome DevTools, dynamic imports, code-splitting, bundle analysis

Testing & Quality: ESLint, cross-browser debugging, code reviews

AI-Assisted Development: GitHub Copilot, Claude, AI-assisted debugging, prompt engineering

Tools & Deployment: Git, GitHub, Vercel, GitHub Actions (CI/CD), Google Analytics, SEO optimization, Sentry

PROFESSIONAL EXPERIENCE

Frontend Engineer | Cyntonisca Ltd (Smart Law Office)

Jul 2025 – Feb 2026 | Remote

- Architected a scalable frontend from scratch with Next.js App Router and TypeScript, writing the team's code-style and folder-structure conventions and cutting new-engineer onboarding time by 40%.
- Built a real-time collaboration module and interactive calendar on WebSockets, supporting 20 concurrent users across 5 client accounts.
- Enforced end-to-end type safety by sharing Typescript schemas across UI and data-fetching layers, reducing integration issues and improving development consistency.
- Built a reusable, accessible (WCAG 2.1 AA) component library using shadcn/ui and custom React components, documenting reusable UI patterns with Storybook to improve consistency and reducing feature-to-production time from 3 days to 2 days.
- Implemented role-based access control and session validation with Next.js Edge Middleware and JWT, securing 4 user roles across the platform.
- Led frontend code reviews and sprint planning for a team of 2, and worked with backend engineers to cut average API payload size by 30%.

Frontend Developer | Visionary Services

May 2024 – Mar 2025 | Remote

- Built responsive, semantic UI components meeting WCAG accessibility standards in React and Next.js, shipped to 30 production users.
- Integrated OAuth 2.0 flows to secure client-side routes for 6 protected application areas.
- Cut initial page-load time by 40% (from 3.5s to 2.1s) via lazy loading and code-splitting.

Frontend Developer | Zentrix Innovative Labs

Nov 2023 – Mar 2024 | Remote

- Improved Core Web Vitals scores from failing to passing Lighthouse threshold through image optimization, dynamic imports, and bundle-size reduction, cutting bundle size by 35%.
- Resolved browser compatibility issues across Chrome, Firefox, Safari and Edge while maintaining responsive layouts.
- Converted Figma design systems into production React components with 90% design fidelity / 10% revision cycles.
- Integrated payment gateways handling 100 transactions using native JavaScript and async REST handlers.

Freelance Frontend Developer | Self-employed

May 2023 – Jul 2023 | Remote

- Delivered 15 web applications and landing pages for early-stage startups, from repository setup to Vercel deployment.
- Built SEO-optimized landing pages with Tailwind CSS and Framer Motion, increasing conversion/sign-up rate by 18% for 5 clients.

- Redesigned legacy user flows into modern, responsive UIs, improving usability and navigation consistency across desktop and mobile devices.

SELECTED PROJECTS

Smart Law Office — Legal SaaS Platform

- Multi-role legal operations platform: real-time client messaging, document management, automated billing, analytics dashboards. Stack: Next.js (App Router), TypeScript, Tailwind CSS, Zustand.

Bankify (bankify-sigma.vercel.app)

- Modern, responsive banking application built with Next.js, Typescript, Tailwind CSS and React Query.

User Dashboard (dashboard-react-js-tailwind-css.vercel.app)

- Built with react.js, re-charts for integrating Bar chart and TailwindCss for Styling.

Propellent (propellent-nine.vercel.app)

- Startup marketing site built for fluid interaction and narrative scrolling. Stack: React, TypeScript, Framer Motion, Tailwind CSS.

EDUCATION & CERTIFICATIONS

- B.Sc. in Microbiology — Redeemer's University (2016 – 2020)
- Meta Front-End Developer Professional Certificate — Meta / Coursera
